

Not A Normal Saddletank

Big Rig LNG Saddletanks

This is a 119 gallon liquid natural gas tank with a 72 gallon partner on the other side of this HEB Grocery truck. HEB has around 40 of these trucks on the streets of Houston. This adds a new problem to look out for on commercial vehicle accidents. HEB and Houston based SYSCO run these vehicles in our area. Here is a picture of the HEB tank and some pictures from the manufacture Sterling. As you can see there is not a lot of protection offered in the case of an accident. The valves are relatively well exposed only covered by a small metal grate.

The Pickens Plant / LNG Production and Storage

Among Clean Energy's customers are Dallas Area Rapid Transit (DART) and Sun Metro (El Paso), and the **Houston operations for Sysco Food, and HEB**. Other LNG customers include The City of Phoenix (AZ), Adams Lake Lumber (British Columbia), and Norcal Waste Systems (San Francisco, CA).

Thanks for Bruce Tynan and Mike Gallagher for this information.
